1. List of ICGLR Member States

1. Angola,
2. Burundi,
3. Central African Republic,
4. Kenya,
5. Republic of Congo,
6. Democratic Republic of Congo,
7. Rwanda,
8. Sudan
9. South Sudan
10. Uganda,
11. United Republic of Tanzania
12. Zambia.

*Boundaries and names shown on this map do not represent the official position of the ICGLR

The DRC and Adjoining Countries versus the World Global Production and Traceability bodies making fortune on the expense of ASM miners

Symbol	Commodity	%	TRACEABILITY FEES in USD / ton contained
Ta	Tantalum/Colu mbite	32.4	180
Sn	Tin ore(Cassiterite)	4	130
Au	Gold	0.7	?
W	Tungsten(Wolfr am)	1.4	120

3. The Impact of the New EU law on Conflict Minerals on Africa

- 1.No free movement of 3 Ts G in the IGGLR countries
- 2.High chain of custody ,certification and traceability costs
- 3.Traceability process is time costly
- 4.Lack of trust in the regional supply chain
- 5.Few from 11 countries produce 3T but Gold production is high and will be very affected
6. More investors will stop investing in the region
- 7.ASM will carry all the certification costs, not the smelters nor end users as it is currently the case
- 8.Impact on livelihood of poor ASM communities in region- Rather silencing guns and put embargo on arms and ammunitions to the militia group than penalizing ASM mining operators
